

The Art of Cardiac Arrest Reporting

Al Baraha 2

09:00 - 12:30

09:00 – 09:10	Welcome and introduction <i>Objectives, introductions, and current reporting challenges.</i>
09:10 – 09:45	From care to report <i>Registry purpose; linking dispatch, EMS, and hospital records; quality improvement, benchmarking, and research.</i>
09:45 – 10:05	From report to registry <i>Regional data gaps, case capture, missing outcomes, and data quality. Group discussion on the first gap to address.</i>
10:05 – 10:30	From registry to improvement <i>Five reporting domains, core and supplemental variables, eligibility, and key definitions.</i>
10:30 – 10:45	Coffee break
10:45 – 11:10	Applying Utstein to a record <i>Timestamps, bystander CPR, AED use, rhythm, ROSC, and outcomes. Guided completion of the data collection form.</i>
11:10 – 11:40	Practical simulation <i>Live cardiac arrest scenario. Groups capture events and complete the form with designated recorder and reviewer roles.</i>
11:40 – 12:05	Case review and debrief <i>Compare forms, reconcile conflicting entries, identify missing information, and assign hospital follow-up actions.</i>
12:05 – 12:20	Turning findings into action <i>Each group proposes one reporting improvement with an owner and review date.</i>
12:20 – 12:30	Questions and closing <i>Key learning points, workshop evaluation, and next steps.</i>
12:30 – 13:30	Lunch
